What we've done

- Scoping

  - We decided that the KPI is accuracy (see Stakeholder and KPI document for more details)

  - To measure this KPI, we want to mostly optimize our model for true positives, with some consideration for overall accuracy

- Data Scraping

  - We scraped 88 nomination ids from the IMDB database

  - We scraped 3900 movies in the animated film category

- Exploratory Data Analysis

  - This and the following parts are a work in progress

- Feature Engineering

- Model Training
